OUR ASSURANCE SERVICES

Internal Audit

Audits and reviews focused on operational, strategic and financial risks. Bringing together generalist and specialist auditors to deliver outstanding results.

Claims Auditing

Establishment audits, early contractor involvement reviews, competitive alliance reviews, financial audit of construction progress claims to large government infrastructure projects and financial health assessment of companies prior to letting of contracts. Our team of experienced auditors will provide organisations with an independent and effective approach in the validation of claims.

Compliance Auditing

Audits focused on adherence to regulatory guidelines, industry standards or policy risks. We will provide subject matter experts to help management monitor compliance.

Project & Program Assurance

Complex projects and programs reviews providing independent and objective oversight. Implementation and benefits realisation reviews and gateway reviews of large projects. We will provide experts who will provide management an independent and objective oversight on the performance of major projects to ensure that successful project are delivered.

Performance Audits

Audits which examine an organisation's economics, efficiency and effectiveness in resource deployment. We will deliver an independent assessment of specific functions within an organisation.

Process Mapping & Control Evaluation

The identification and evaluation of control points across a range of sectors and industries. We work with organisations to develop operational process maps and control evaluations.

Quality Assurance Reviews

Assessment of conformance with IIA Professional Standards complimented by value adding insights to enhance the quality and effectiveness of internal audit functions. We have a team of IIA accredited auditors who will can perform Quality Assurance Reviews.

OUR PEOPLE

Our specialists bring together a diverse range of skills and knowledge providing the best approaches to even the most complex of projects. Utilising a 'top-down' consultative approach and a 'bottom-up' transactional analytics approach, we provide organisations with the skills to improve, identify and convert opportunities, increase profitability and achieve their objectives and goals.

The difference is our people.
