

Governance, Risk Management & Compliance

Rapid changes in business, technology and regulatory environments result in organisations continuously challenging their governance, risk and compliance programs. OCM assists management and boards to develop and implement governance frameworks which are tailored to their individual needs.

OUR GRC SERVICES

Board and Audit Committee Effectiveness

For a Board or Committee to be effective it should take a disciplined and professional approach. Our experienced staff can conduct assessments or provide tools to undertake self-assessments to ensure your Board/Committee is appropriately structured and operating according to best practice governance principles.

Risk Management

Organisations need to know how to anticipate and manage risk. We work with management to design risk management frameworks aimed at enhancing stakeholder confidence and assist with strategic and operational risk requirements.

Policies and Procedures Development

A policy and procedure framework underpins an organisation's overall approach to governance. We help organisations to develop policies and procedures which focus on responsibilities, accountabilities and critical activities whilst ensuring agility in day to day operations.

Corporate Compliance Frameworks

Maintaining a compliance framework which is appropriate to the size and complexity of an organisation is key. We help organisations develop robust and streamline frameworks which help manage your key risks and regulatory obligations.

Project Governance

Poor project governance can have a substantial and lasting impact to an organisation. We provide secondments, independent project assurance, training & mentoring to project teams to ensure successful projects are delivered.

Business Continuity Management

Disruption is an inescapable and growing challenge for all industries. We work with organisations to design, develop, implement and maintain BCM programs which are focussed on prevention, preparedness, response and recovery.

OUR PEOPLE

Our specialists bring together a diverse range of skills and knowledge providing the best approaches to even the most complex of projects. Utilising a 'top-down' consultative approach and a 'bottom-up' transactional analytics approach, we provide organisations with the skills to improve, identify and convert opportunities, increase profitability and achieve their objectives and goals.

The difference is our people.

WHY OCM?

- Highly experienced
- Depth and knowledge
- Proven track record
- Quality and value
- Independent
