OUR DIGITAL ASSURANCE SERVICES

Information Security

Treating information security as essential, ensuring protection regardless of its handling, processing, transportation, or storage.

Data Governance

Assisting clients in creating and overseeing data governance frameworks for a more coordinated and effective approach to managing data availability, usability, integrity, and security.

IT General Controls

Assuring IT general controls for the overall digital ecosystem, including but not limited to accessibility of data, response to disruption, digital resilience, change management, cloud services, as well as security controls.

Program and Project Assurance

Providing assurance to governance groups, including Boards, over managing and mitigating risks for delivering successful programs and projects. Essential for building stakeholder trust and increasing the likelihood of project success.

Cyber Risk Management

Ensuring the implementation of cyber security controls for system and data protection, with a focus on subsequent risk assessments and audits in the established cyber security environment.

Supply Chain Risk Management

Supporting clients in assessing their suppliers' security controls are based on the level of risk to digital assets and services.

Threat & Incident Management

Helping clients enhance threat and vulnerability management maturity in business applications, systems, and networks through assessments, patching, monitoring, and threat intelligence.

Business Resilience

Maintaining trust in your digital environment is essential for any organisation. OCM helps establish effective controls for both regular use of digital services and recovery from disruptions.

OUR PEOPLE

Our specialists bring together a diverse range of skills and knowledge providing the best approaches to even the most complex of projects. Utilising a 'top-down' consultative approach and a 'bottom-up' transactional analytics approach, we provide organisations with the skills to improve, identify and convert opportunities, increase profitability and achieve their objectives and goals.

The difference is our people.

WHY OCM?

- Highly experienced
- Depth and knowledge
- Proven track record
- Quality and value
- Independent
